

### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

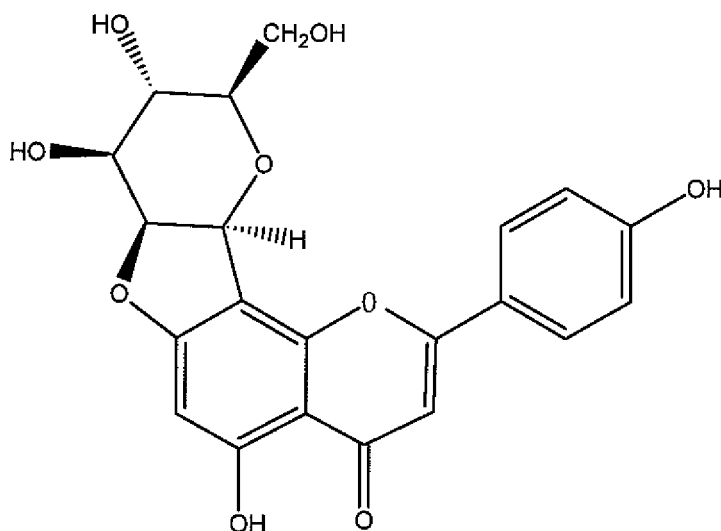

#### Listing of Claims:

1. (Currently amended) [[A]] An isolated flavone C-glycoside derivative of formula  
(1) purified to at least about 0.001 weight % dry solids:

or a salt thereof.

2. (Currently amended) [[A]] An isolated flavone C-glycoside derivative of formula (2) purified to at least about 0.001 weight % dry solids:

or a salt thereof.

3. (Previously Presented) A pharmaceutical composition containing at least one of the flavone C-glycoside derivative or salt thereof according to claim 1 in a therapeutically effective amount to treat an allergic disease.
4. (Original) The pharmaceutical composition according to claim 3 wherein said allergic disease is at least one selected from atopic dermatitis, contact dermatitis and pollenosis.
5. (Previously Presented) A food composition containing at least one of the flavone C-glycoside derivative or salt thereof according to claim 1 as an anti-allergic component in a therapeutically effective amount to treat an allergic disease.

6. (Original) The food composition according to claim 5 in the form of any one of dietary supplements or other nutrient drinks, healthy drinks, healthy teas or other drinks.
7. (Original) The food composition according to claim 5 in the form of any one of confectionery, breads, noodles, processed soy products, dairy products, processed egg products, fish cakes, fats and oils or seasonings.
8. (Previously Presented) A cosmetic containing at least one of the flavone C-glycoside derivative or salt thereof according to claim 1 as an anti-allergic component in a therapeutically effective amount to treat an allergic disease.
9. (Original) The cosmetic according to claim 8 in the form of any one of skin care products, makeup products, hair cosmetics or bath products.
10. (Previously Presented) A method for the preparation of a pharmaceutical composition, food composition, or cosmetic having an anti-allergic effect, comprising adding at least one of the flavone C-glycoside derivative according to claim 1 or salt thereof to said pharmaceutical composition, food composition, or cosmetic.
11. (Previously Presented) A pharmaceutical composition containing at least one of the flavone C-glycoside derivative or salt thereof according to claim 2 in a therapeutically effective amount to treat an allergic disease.
12. (Previously Presented) A food composition containing at least one of the flavone C-glycoside derivative or salt thereof according to claim 2 as an anti-allergic component in a therapeutically effective amount to treat an allergic disease.
13. (Previously Presented) A cosmetic containing at least one of the flavone C-glycoside derivative or salt thereof according to claim 2 as an anti-allergic component in a therapeutically effective amount to treat an allergic disease.

14. (Previously Presented) A method for the preparation of a pharmaceutical composition, food composition or cosmetic having an anti-allergic effect, comprising adding at least one of the flavone C-glycoside derivative according to claim 2 or salt thereof to said pharmaceutical composition, food composition or cosmetic.
15. (Withdrawn) A method of treating an allergic disease, comprising: administering to a patient in need of treatment for an allergic disease a therapeutically effective amount of at least one of the flavone C-glycoside derivative or salt thereof according to claim 1.
16. (Withdrawn) A method of treating an allergic disease, comprising: administering to a patient in need of treatment for an allergic disease a therapeutically effective amount of at least one of the flavone C-glycoside derivative or salt thereof according to claim 2.
17. (New) A pharmaceutical composition containing at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative or salt thereof according to claim 1 to treat an allergic disease.
18. (New) The pharmaceutical composition according to claim 3 wherein said allergic disease is at least one selected from atopic dermatitis, contact dermatitis and pollenosis.
19. (New) A food composition containing at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative or salt thereof according to claim 1 as an anti-allergic component to treat an allergic disease.
20. (New) The food composition according to claim 5 in the form of any one of dietary supplements or other nutrient drinks, healthy drinks, healthy teas or other drinks.
21. (New) The food composition according to claim 5 in the form of any one of confectionery, breads, noodles, processed soy products, dairy products, processed egg products, fish cakes, fats and oils or seasonings.

22. (New) A cosmetic containing at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative or salt thereof according to claim 1 as an anti-allergic component to treat an allergic disease.
23. (New) The cosmetic according to claim 8 in the form of any one of skin care products, makeup products, hair cosmetics or bath products.
24. (New) A method for the preparation of a pharmaceutical composition, food composition, or cosmetic having an anti-allergic effect, comprising adding at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative according to claim 1 or salt thereof to said pharmaceutical composition, food composition, or cosmetic.
25. (New) A pharmaceutical composition containing at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative or salt thereof according to claim 2 to treat an allergic disease.
26. (New) A food containing at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative or salt thereof according to claim 2 as an anti-allergic component to treat an allergic disease.
27. (New) A cosmetic containing at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative or salt thereof according to claim 2 as an anti-allergic component to treat an allergic disease.
28. (New) A method for the preparation of a pharmaceutical composition, food composition or cosmetic having an anti-allergic effect, comprising adding at least about 0.001 weight % dry solids of one of the flavone C-glycoside derivative according to claim 2 or salt thereof to said pharmaceutical composition, food composition or cosmetic.
